TECHNOLOGIES USED

Next.js, React, React Native, TypeScript, Redux, Zustand, HTML, CSS, Radix UI, Tailwind, Framer Motion, Postgres, MySql, Node.js, Express.js, Supabase, Strapi, Directus, Git

PROFESSIONAL EXPERIENCE

Vioo Company Ltd

Feb 2023 - Present

Frontend Programmer

- Led the UI/UX design and implementation of a large scale website using Next.js incremental static regeneration, React, and Strapi headless CMS, reduced loading time of 2000+ pages by over 90%
- Assisted with enhancing React Native applications, cutting app launch time by 25% and streamlined memory usage to improve responsiveness and minimise crashes
- Conducted performance audits, UI updates and extensive code refactoring to align legacy codebases of several existing React projects with industry standards and best practices
- Utilised Next.js server-side rendering capabilities to optimise SEO, resulting in improved search ranking and organic traffic across multiple projects
- Applied modern UI/UX principles and animations to both website and mobile application projects with Framer Motion, enhancing user engagement and satisfaction

NOSH Meal Plans

Mar 2021 - Apr 2022

Marketing Executive

- Led several social media campaigns, increased engagement rates and grew follower count from 5,000 to 10,000+, while assisted with designing engaging posts for audience interaction

CACEIS Hong Kong Trust Company Limited

Aug 2019 - Jul 2020

Intern

- Monitored and validated market pricing data of investment products in internal repositories
-

PROJECTS

[Japanese Learning Site](#) ↗

- Developed a Japanese grammar learning website with Next.js, React, Directus CMS, PostgreSQL, Framer Motion, and Markdown integration for content management
-
